## 1. Introduction

W708 module is designed for easy-design-in low cost Wifi application。 It has WAN, LAN, UART, I2C, SPI, I2S, SDXC and GPIO interfaces。 Support 1T1R 150N operation. 3.3V single power supply.

There are industrial grade and commercial grade two different configuration. For industrial grade, we use industrial grade DDR2 memory. component. For commercial grade, we use commercial grade DDR2 memory. component.

## 2. Technical specification

### a. Channel Plan

country code	region	channel
0	North America	CH1 ~ 11
1	Others	CH1 ~ 13
5	Japan	CH1 ~ 14
6		CH3 ~ 9
7		CH5 ~ 13

Note : The country code is configured before shipping and can not be changed by user.

### 3. Software features

- Support WPS
- Support AP ( Access point ) 、 Client ( Wifi Station) mode
- **AP mode**
  - Default operation mode. In this mode, the module work as an Access Point, don't need any configuration.
  - User can use PC via RJ45 or smart phone via Wifi to login AP mode and change the default configuration ( through browser).
- **Client mode**
  - In this mode, module is a Wifi station.

### 4. Development tool :

We provide development tool for easy connection of power, RS-232, LAN, WAN, and USB port.

### 5. Module Dimension : 35\*25 mm

There are two 1.27mm pitch header on the bottom side of module P1 and P2.

## 7. Memory configuration

Depending on customer's request, the module can be shipped with following configuration :

Flash size : 2MB, 4MB, 8MB, 16MB, 32MB, 64MB

DDR2 size : 64MB, 128MB

## 8. Mechanical Application Notes

1. CON0 is IPEX1 connectors on top side
2. P1 is 2\*10 pins 1.27mm male header on bottom side for signals
3. P2 is 2\*14 pins 1.27mm male header on bottom side for signals
4. Footprint of P1, P2 is as following :

5. There are four slot holes used for installing metal shielding cover if needed
6. There are two diameter 2.1mm holes for screw fixing
7. The mechanical drawing in .dxf format is available under request.
8. Bottom view 2D drawing is as following :

## 9. Shipping & package information

W708 is packaged with stacked PS tray :

- Tray size : for each element, the size is 45\*35\*12 mm, there are 8\*8 elements for each tray. There are 25 trays in each carton. So, total 1600 pieces maximum for each carton.

- Carton size : 500 x 400 x 300 mm
- Carton Label ( packing list ) :

## 10. Ordering Information

The part number for placing order is W708-MM-NN-G.

- MM is bytes of SPI flash and NN is bytes for DDR2.
- G : C for commercial grade or I for industrial grade.
- For example with the standard memory configuration 8MB Flash, 64MB DDR2 and commercial grade, the part number is W708-8-64-I.

## 11. FCC Warning Statement

### FEDERAL COMMUNICATIONS COMMISSION REGULATIONS

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### CAUTION:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

### FCC RF Radiation Exposure Statement

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance **20 cm** between the radiator & your body.

### Important Note

In the event that these conditions can not be example certain laptop configurations or collocation with another transmitter, then the FCC authorization is no longer considered valid the FCC ID can not be used on the final product. In these circumstances, OEM integrator will be responsible for re-evaluating the end product (including the transmitter) and obtaining a separate FCC authorization.

### End Product Labeling

When the module is installed in the host device, the FCC ID label must be visible through a window on the final device or it must be visible when an access panel, door or cover is easily re-moved. If not, a second label must be placed on the outside of the final device that contains the following text:

“Contains FCC ID: **2ALWN-W708**”

The FCC ID can be used only when all FCC compliance requirements are met.

### Manual Information for End Users

The module is limited to OEM installation **ONLY**

The module is limited to installation in mobile or fixed applications, according to Part 2.1091(b)

The separate approval is required for all other operating configurations, including portable configurations with respect to Part 2.1093 and different antenna configurations

The end user must not have manual instructions to remove or install device. The user manual for end users must include the following information in a prominent location:

“IMPORTANT NOTE: To comply with FCC RF exposure compliance requirements, the antenna used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located operating in conjunction with any other antenna or transmitter.” as a result of e-mail transmission.”
